*Assignment no 05*

---

Group members:

Husnat Khalid Raja (BSE181010)

Syed Ammar Ali Shah (BSE181027)

Muhammad Ishaq (BSE181031)

Jibran Rafi (BSE181029)

---

Question no 1: What is Git?

Git is a free and open source distributed version control system designed to handle everything from small to very large projects with speed and efficiency.

Question no 2: what is Git workflow?

A Git workflow is a recipe or recommendation for how to use Git to accomplish work in a consistent and productive manner. Git workflows encourage developers and DevOps teams to leverage Git effectively and consistently. Git offers a lot of flexibility in how users manage changes.
